Indian Institute of Computer Science |

2023-2024

123 Anywhere St., Any City

BACHELOR OF ARTS

DELHI UNIVERSITY | 2021-2025

Delhi 110 007

ABOUT ME

Hey! I'm Vivek Roy, a 21-year-old frontend developer and obsessed with clean design and detail. I really enjoy making new, responsive websites with HTML, CSS, Javascript, Tailwind, and Bootstrap. I like converting complicated ideas into simple, beautiful user interfaces—and when I'm not coding, I'm usually travelling or learning new tools.

EXPERIENCE

Webclick Digital PVT. LTD

Moti Nagar

Jan 2024 – June 2024

- Worked as a frontend intern, collaborating with senior developers and designers to build live production-level projects.
- Used HTML, CSS, JavaScript, jquery Bootstrap to build responsive and user-friendly UIs.

My Role in Live Projects

- Developed complete frontend for multiple websites using HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Focused on clean UI structure, mobile responsiveness, and cross-browser compatibility.
- Implemented custom design changes as per client requirements.
- Optimized layout and navigation for better user experience.
- Ensured all websites are responsive and well-structured using Bootstrap grid system.
- Made UI enhancements, layout fixes, and design updates across different live projects.
- Worked with legacy code and modernized it with cleaner, responsive HTML/CSS practices.
- Used CodePen for quick prototyping and responsive testing.
